DARK AND COLD AS ZERO.

An Experiment Showing the Vast Pressure

In the Ocean's Lowest Depths.

The post for physical conditions of

the deep seas may be briefly stated to be

these: It is absolutely dark, so far as

actual sunlight is concerned; the tem-

perature is only a few degrees above

freezing point; the pressure is enormous;

there is little or no movement of the

water, the bottom is composed of a uni-

form, fine, soft mud, and there is no

plant life. All of these physical condi-

tions are in appreciation, except the

enormous pressure. At a depth of 2,500

fathoms the pressure is, roughly speak-

ing, 2 1/2 tons per square inch—that is,

to say, the pressure per square inch upon

the body of every animal that lives at

the bottom of the Atlantic ocean is about

25 times greater than the pressure that

will drive a railway train.

Prof. or Moseley describes an interest-

ing experiment in point made during

the voyage of the Challenger. Mr.

Buchanan here made a tube full of air and

several inches in length. He wrapped it

in flannel and placed it in a wide copper

tube, one of those used to protect the

deep sea thermometers when sent down

with the Challenger's apparatus. This cop-

per tube was closed by a stopper at the

top, and the bottom of it, and the copper

bottom of the tube was similarly

had holes bored through it. The

water thus had free access to the interior

of the tube when it was lowered into

the sea, and the tube was necessarily

constructed with that object in view, so

that in its ordinary use the water should

freely reach the contained thermometer.

The copper case containing the sealed

glass tube was sent down to a depth of

2,000 fathoms and drawn up again. It

was then found that the copper wall of

the case was bulged and bent inward

opposite the place where the glass tube

lay, just as if it had been crumpled in-

ward by being violently squeezed. The

glass tube itself, within its flannel

wrapper, was found when withdrawn

reduced to a fine powder, like snow al-

most.

What had happened was that the sealed

glass tube, sinking to gradually in-

creasing depths, had held out long

against the pressure, but this at last

had become too great for the glass to

sustain, and the tube had suddenly given

way. So violent had been the collapse

that the water had not had time to rush

in at the perforations, but instead had

crushed in the copper wall and brought

equilibrium in that manner, and this

process is exactly the reverse of an ex-

plosion and is termed by Sir Wyville

Thomson an "implosion."—Philadel-

Children Cry for Pitcher's Castoria.

The Greeks are considered the prin-

cipal sponge fishers, and it takes much

experience, skill and hardihood to qual-

ify a man for a first class place among

sponge divers. Many of the most val-

uable specimens are found at a depth

varying from 10 to 35 fathoms. To aid

in the descent, the divers make use of

a triangular stone, with a hole in one

corner, through which a rope is spliced.

On reaching the deep sea gardens, where

the rock ledges are clothed with marine

growth, the diver, retaining a hold on

his rope, dexterously breaks away the

holdfast of the sponges and places them

under his arm until a sufficient load has

been gathered, when a pull on the rope

signals his companions above that he is

ready to ascend, and he is then hauled

to the surface, bearing his ocean treas-

ures.—Exchange.

Manuscript of "The School For Scandal."

No printed version of "The School

For Scandal" was prepared for publica-

tion by Sheridan. He always alleged

that he could not supply one with which

he was perfectly satisfied. Yet he made

the attempt, and Mr. Fraser Rae has

discovered the copy containing his final

corrections, in many scenes,

which Moore must have overlooked, the

documents at his disposal having recent-

ly been put into Mr. Fraser Rae's hands

by Sheridan's descendants for the pur-

pose of writing a complete biography of

the great dramatist and orator. The

manuscript is imperfect, yet enough is

extant to show how effectively Sheridan

could add a fresh charm to his polished

phrases.—London Athenaeum.

Rulers of Horses and Men.

It is instructive to compare the vis-

age of the ruler of horses with that of

the ruler of men. The latter's face

shows command in the mouth, the drill

sergeant's in the mouth, and the eye.

The last is undoubtedly the most effec-

tive instrument in exacting obedience

from our own species. Here we get a

hint of the cause of that want of dig-

nity, that element of coarseness, which

is discernable in the countenances of

some men and women who have much

to do with horses. The higher and no-

bler method of expressing authority is

outweighed by the lower and more ani-

mal one.—Blackwood's Magazine.

Are Men Getting More Vain?

A local philosopher, who makes a

practice of observing other people's

manners and commenting upon their

habits, states that nearly every man now

carries a pocket mirror. According to

him, this habit has grown immensely

of late, and nearly every man can be

observed at frequent intervals pulling

a glass out of his pocket and looking at

the set of his necktie or the appearance

of his whiskers.—Philadelphia Call.

## BREVITIES.

Dr. Bergstein arrived from the west yesterday.

Lonis Dean returned from San Francisco last night.

H. J. Thyes returned from San Francisco last night.

W. C. Watson of Carson, arrived from the west yesterday.

Carriage painting at McKinney's blacksmith shop. See ad.

Jack and Arthur Raycraft changed cars for Carson yesterday.

Mr. and Mrs. A. Nelson returned from San Francisco last night.

Mrs. R. H. Kinney and daughter arrived from the west yesterday morning.

Wm. Read grand master I. O. O. F. was registered at the Palace yesterday.

A liberal reward is offered for the recovery of a lady's gold watch see advertisement.

Garden hose, lawn mowers, paints and oils at lowest prices at Lange & Schmidt's.

The next theatrical attraction will be Stuart Robson. In "The Henrietta," on the 21st.

Professor Pearce, the celebrated organist and pianist, is down from Virginia City.

Ayer's Sarsaparilla, being a highly concentrated alternative, only small doses are required.

Mrs. M. A. Haynesworth a sister of the late President Arthur is visiting Mrs. G. T. Bender.

The District Court was occupied yesterday in hearing the case of W. Roberts vs. W. H. Greer.

Bids will be received until the 22nd inst. for privileges at the Odd Fellows picnic at Carson. See notice.

D. R. Sessions, ex-State Superintendent of Schools, was a passenger on the west-bound yesterday afternoon.

Constipation causes grief. But the trouble need be brief. For Ayer's Pills give prompt relief.

Governor Colcord and staff have accepted an invitation to assist in the celebration on July 4th at Virginia City.

The next session of the Grand Lodge of Masons will be held in Reno convening on the second Tuesday in June 1895.

The *Silver State* says it is probable that Humboldt will cast the largest vote of any county in the State next November.

If you want a good fitting pair of boots or shoes—no scab work from strangers—go to H. F. Pavola, who is reliable and no stranger.

The *Silver State* says T. J. Akers of Ogden has been appointed Trainmaster of the Truckee Division, with headquarters at Winnemucca.

The largest assortment of heating stoves, parlor stoves, cook stoves and ranges, crockery and lamps at panic prices at Lange & Schmidt's.

W. G. Carpe, an examiner for the postal service, arrived yesterday from the West, and will examine the postal clerks of Reno, Carson and Virginia.

If the hair has been made to grow a natural color on bald heads in thousands of cases, by using Hall's Hair Renewer, why will it not in your case?

The best place to buy fishing tackle, gum boots, groceries and all kinds of provisions and canned goods is at R. C. Wills. Call and get prices before purchasing elsewhere.

"And this maid—Is she truthful?" asked the lady of the reference. "Very," that is why I discharged her. She wouldn't tell people I was out when I was in."

Seventy-five girls employed as waitresses in a Toledo, Ohio, restaurant struck rather than wear caps. They had submitted to various other regulations, but thought this order capped the climax.

R. O. Wills has received a carload of sugar which he has to dispose within the next two weeks. He will sell it at \$6 per 100 pounds. Mr. Wills is selling goods at bedrock prices and now is your time to get bargains.

Every person is invited to call at the Viava Company's agency, on Fourth street, between Chestnut and Nevada, and gain valuable information regarding Viava. I make no misrepresentation.

Mrs. B. E. Hunter.

The Odd Fellows Literary Committee for the Fourth of July Reunion and Picnic have thus far arranged the program: J. C. Hazlett of Dayton, President of the day; Hon. C. C. Powning of Reno will deliver the oration, and Miss O. Zeherle, a graduate of the State University will read the poem.

A reception in honor of Bishop Leonard and the Rev. Mr. Unworth was given at the residence of Mrs. M. D. Foley last evening and was largely attended. A pleasant evening was spent and many good wishes expressed for the future of the church and the two reverend gentlemen above named.

Mrs. Thomas E. Haydon, son and daughter, Miss Mabel Stanaway, Miss Grace Ward, Miss Kate Reigelhuth, Miss Lena Monroe, Lem Osborne, J. Clemmens, Mrs. Clemmens, Miss Lena Joy, Miss Van Duzer, Miss Nellie Pierce, Miss Unruh, Miss Loder and Mrs. Prof. Miller were passengers on the west-bound train last night.

## THE MONEY QUESTION.

Congressman Newlands' Speech on the Paramount Issue.

The Congressional Record of June 6th has the following:

Mr. Newlands.—Mr. Speaker, I realize that the House is wearied by this long-continued session, and I shall not take up much of its time. I wish to express the great sympathy I have with the demands of certain sections of this country for an increased volume of money. That is the burning question of the time; it is the question above all questions that demands immediate solution. But it is of the highest importance, when we are considering a measure for the increase of our currency, to analyze the nature and character of the proposed increase, and to determine whether it is based upon sound monetary principles, will meet the strain of existing conditions and tend not to the fulfil but to the permanent prosperity of the very interests which it purports to serve.

## THE GOLD DISEASE.

What is the disease with which we are afflicted? Is it a disease that pertains only to this country? No; it is a disease that afflicts the world—the gold disease. That disease has been fastened upon us by the destruction of one-half of the primary money of the world, that money which has existed through the ages unchallenged until twenty years ago.

Half of that primary money has been destroyed, and as a result the value of the other half has been increased until every unit of that other half will purchase double what it would twenty years ago. This is the disease we seek to cure, the evil we wish to remedy—the evil of falling prices, as we express it. A better term is the appreciation of gold; gold, which now by our folly is made the only measure of value, the only debt payer, the only value which in itself is exchangeable for all other values, the only money of ultimate redemption. We wish to restore prices. How can we do this save by stopping the appreciation of gold? And how can we accomplish this save by restoring to its old position of efficiency its only natural competitor, silver?

Now, gentlemen, we all know that there has never been enough either of gold or silver in the world to discharge the functions of money, and for that reason one-third of the money of the world is and has been for years paper money uncovered by either gold or silver. And yet we have destroyed one-half of the primary money in which that paper is to be redeemed, and have practically reduced the money of the world to gold alone.

## THE WRONG REMEDY.

Now, how do you seek to remedy this condition? You have failed thus far in the restoration of silver. How do you propose to stop the appreciation of gold? By the increase of debts payable in gold; that is all. For recollect you do not make money in any financial sense by permitting the banks to issue paper notes. That is a great mistake. The engraved promissory note does not differ in character from the written or printed promissory note. Both alike, under our present system, are payable in gold, and the bank's promissory note has no more significance or potency than the individual's promissory note so far as its debt-paying or exchangeable function is concerned.

Now, I ask again what you propose to do? You propose to increase the promissory notes payable in gold. You who realized the strain that was put on the banks last year, propose now to increase the promissory notes of the banks. And what was that strain? Simply the demands of their depositors. These banks borrow from their depositors on call and loan on time, and when the time of stress comes they must respond to the depositor's demand or go to the wall; and hence they call on those owing them money on call and time obligations. Then follow forced sales, ruinous realizations, and falling values.

Now, we all know the difficulties under which the banks suffered last year. Many of them became hopelessly bankrupt; many suspended payment, and many of them kept up a quasi life by practical suspension through the issuance of clearing-house certificates. Their difficulties arose from the fact that they had obligations out on call. You propose now to add to such obligation—the obligation to the depositor—another obligation—that is the obligation to the note holder, an obligation which must be responded to on demand, and only in gold, for recollect now we are on a gold basis. Do you mean to tell me that you can diminish the appreciation of gold by increasing the calls for gold? Can you diminish the value of a thing by increasing the demand for it?

The great evil of the times has been that our banks have had too great a strain upon them, and yet you propose to add to that strain this additional one, the failure to respond to which works at once the destruction of the issuing bank, the violent contraction of the currency.

Now, gentlemen, if you carry this measure what will be the result? In their various localities perhaps two or three hundred millions of promissory notes can be issued by the various banks, but will that relieve the financial strain?

Assuming that these promissory notes will be taken as money and pass current, you must realize the fact that you have an additional strain upon the banks, because there is not gold enough in the world to respond to these demands in addition to the existing demands. The demand on notes, on bonds, and the amounts due depos-

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

# Royal Baking Powder

## ABSOLUTELY PURE

tors on call must be met now, and you only tend still further to appreciate gold by the increase of new call obligations when you propose to add to all these obligations now existing others of a doubtful character, of a doubtful efficiency as money, increasing, I repeat, the strain on gold rather than diminishing it.

## THE EFFECT OF BRUTAL LEGISLATION.

Now, just think. There are four thousand millions of silver money in the world at the coinage value. The value has been diminished one-half by brutal legislation. The world, therefore, has met with a contraction in its primary money of one-half of the value of silver, and silver being one-half of the world's metallic money, the result is that out of eight thousand millions of our metallic money we have experienced a contraction of two thousand millions, or one-fourth of it. Are you going to relieve the effect of that condition by the issuance of two or three hundred millions of paper notes in this country? Will it raise prices? Can you withstand the withering effects of the destruction of two thousand millions of currency throughout the world by creating two or three hundred millions of so-called paper money of doubtful efficiency? And recollect that, so far as prices are concerned, there is a world-wide level of prices.

## THE WAY TO RESTORE PRICES.

The price you get for your wheat and cotton in the West and South is the price that you get in London, plus the transportation. Do you think that you will be able to raise these prices by the issue of two or three hundred millions of paper money, so called, but really money in no sense whatever; mere promissory notes, redeemable in gold; not a legal tender, not receivable for public dues, and having no debt-paying power?

There is but one way to restore prices, and that is to stop the appreciation of gold; and there is but one way of doing that, and that is to restore its only rival, silver. [Applause.]

Now, I realize the fact that there is not gold and silver in the world to perform the functions of money. I realize that the world will have to go beyond the existing or future supply of the precious metals for its money, but when it does, it will not, if it is wise, create money redeemable in either gold or silver. For when you create paper redeemable in gold or silver, then the gold and silver are the only moneys of ultimate redemption, and all you have beyond are national or bank promissory notes payable in gold and silver. You do not really increase the money volume at all.

## VALUE OF MONEY DEPENDS UPON ITS QUANTITY.

When the world enters upon scientific methods for making money, it will first avail itself of all the precious metals, both gold and silver, the primary money of the world, the metallic money, the money of ultimate redemption; and then it will create fiat money, legal-tender money payable to the Government for dues, but otherwise irredeemable money possessing value simply by reason of limitation in quantity.

Of course, if you increase that fiat money indefinitely it will become less and less valuable. If you diminish its quantity, the value increases as the quantity diminishes, and there would be a scientific method, when an insufficiency of gold and silver was ascertained, as it is now, of gradually increasing the money of the world by the issue of fiat money.

We all know that the value of money depends upon its quantity; but so far as I am concerned I should prefer to have that quantity first regulated by nature rather than by law. Nature in her wisdom has guarded these two precious metals from man. She produces them only in limited quantities. Do you realize how limited they are? I made a calculation some years ago verified by the Director of the Mint, which showed that all the silver coin in the world, the accumulation of the ages, that for which men have worked and fought through the centuries, could be placed in a building 100 feet long, 100 feet wide and 30 feet high, less space than that occupied by this Chamber, and that all the gold coin in this world could be put into a space one-sixteenth of that size. Think of the folly of talking about an over production of either metal, in the face of those facts.

But I realize that the limitations of nature are too severe; that we must relax them, even after we have exhausted the present beneficence of her mines of both gold and silver, and that we must have paper currency; but that paper currency should not be the paper currency designed by this act, having no legal tender quality, not receivable for public dues, and redeemable only in gold, but fiat money redeemable only in itself, and having a legal tender quality, a debt-paying power, and limited in quantity by wise legislation.

I admit that in that case we will have to trust to the wisdom of men in legislation, and from my experience in this and the preceding session of this Con-

gress I am sure I would rather trust nature than I would rather trust legislators. [Laughter.] But it is a necessity, and we must look to better education for higher methods of determining that question, fraught with more of beneficence or of evil to mankind than any other that at present agitates the world. [Applause.]

## SCHOOL EXERCISES.

The Third, Fourth, Fifth and Sixth Grades Do Honor to Their Teachers.

The exercises of the Third and Fourth Grades at the high school were held Wednesday afternoon. Great interest was manifested in the event, if the large crowd in attendance was an indication. Miss Rulison and Miss Joy have charge of these departments, and every feature of the excellent program showed the care and training the young people had received from these estimable ladies. The program consisted of recitations, vocal and instrumental music, the most notable of which was the plantation representation of "Trabbling Back to Georgia." The half dozen boys with corked faces and appropriate costumes entered into the scene with a gusto that would have been creditable to old negro minstrels. The tambourine drill by eight little girls, suitably costumed, must be seen to be appreciated. In fact, the whole entertainment, had it been given in the Opera House, would have held an audience until the last curtain had been rung down.

## THE FIFTH AND SIXTH GRADES

Held closing exercises yesterday afternoon. The little folks gave an admirable entertainment, and their efforts were greatly appreciated by a large gathering of parents and friends. Among the many features presented the following deserve special mention: The character song, entitled "Beautiful Bells," by ten little girls from Miss Luehan's room, was splendidly given, each little maid throwing all the energy she could muster into the part she had. It was well received by the audience, and the little ones praised. The scarf drill by twelve little girls was very nice. The recitation, "Lasca," by Mabel James, one of Miss Northrop's pupils, was grand. The flower rally by nine of Miss McIntosh's pupils was very entertaining. A cantata entitled "Quarrel Among the Flowers" by a number of girls received many compliments. George Ward gave a recitation in fine style, and the flute solo by Fred Nathan and instrumental music by David Murphy was very pleasing. The exercises concluded by short addresses by Prof. Ring, Prof. Bray and Trustee S. M. Jamison. The teachers are to be congratulated on the successful work accomplished, and the pupils praised for their diligence and improvement made during the past year.

The query was asked by several, why our boys were outdone by the girls in these rooms? Even Trustee Jamison was surprised. The teachers, however, excused the boys on the grounds of bashfulness, absence, etc. Don't let this happen again, boys; brace up next term and make the girls take a back seat. You know they can't go to Congress nor be inaugurated President of the United States, but if they keep on as they have done the past term they will lay you completely in the shade, and the first thing you know will be voting and running for office, while you are standing around wondering how it all came about.

## NOTICE.

Odd Fellows' Picnic, Fourth of July. Bids will be received till the 22d instant for the following privileges on the grounds:

Ice cream, lemonade and other non-alcoholic drinks.  
Fruits and candies.  
Cigars and lunch.  
Soda fountain.  
No spirituous liquors to be sold on the grounds.  
Address  
HUME YERINGTON,  
Carson, Nevada.  
je15td

Baseball.  
The Clippers not being satisfied with their defeat by the Brewers on Decoration Day, have again challenged, and the same has been accepted. The game will take place Sunday the 17th inst at 1:30 on the grounds adjoining the N-C-O. roundhouse.

Awarded  
Highest Honors—World's Fair.

# DR. PRICE'S

## CREAM BAKING POWDER

MOST PERFECT MADE.

A pure Cream of Tartar Powder. Free from Ammonia, Alum or any other adulterant. 40 YEARS THE STANDARD.

Dwight Jones, a native son and not yet twenty-one, had his first open case in court last evening. He was pitted against his brother, Charles A., in the case of T. J. Gardner vs. W. G. Caffrey, before Justice Linn and a jury. Be it said to his credit that he won the case for his client, Mr. Gardner, although his brother made a hard fight; and even the defendant, Mr. Caffrey, spoke in the highest terms of the dignified and gentlemanly handling of the case by Dwight.

The young man is one of Reno's best and brightest boys, and the writer, while knowing both from babyhood and having the best of wishes for the elder brother, could not help but feel a secret pleasure in seeing the younger, in his maiden case in court, so completely rout his elder brother. A bright future is in store for Dwight, and he will add one more to the list to which Reno can point with pride.

## W. Sanders.

W. Sanders has taken a regular course in the science of embalming and the preparation of bodies for burial or transportation. He is prepared to do work in the most satisfactory manner, and at the very lowest living prices. He has a choicely selected stock of undertaking supplies constantly on hand, and can attend to burials at the shortest notice. He is prepared to direct funerals, furnish hearse and carriages and can be called at any hour by telephone. His parlors are No. 11, Virginia street. See his ad. under "New To-Day."

## To Cleanse The System.

Effectually yet gently, when costive or bilious or when the blood is impure or sluggish, to permanently cure habitual constipation, to awaken the kidneys and liver to a healthy activity, without irritating or weakening them, to dispel headaches, colds or fevers, use Syrup of Figs.

Mrs. Angie Thomas

## Sarsaparilla

### CURES

strength. I also had a bunch on my neck as big as a hen's egg, and it bothered me to breathe. Since taking Hood's Sarsaparilla this has disappeared. I feel like a new man and my husband's body has been renewed and he is now able to work. It took two bottles of Hood's Sarsaparilla and is fit for anything now." Mrs. Anna Thayer, Sodaville, Oregon.

Keeps the bowels regular, cures constipation, biliousness, indigestion, and all the ailments of the stomach.

**THE INDIAN EMPIRE.**

INTERESTING COMMENTS BY AN OBSERVING TRAVELER.

The Past and Future of a Great Country and Remarkable People—Made Poor by the Spoilation of Foreigners—English Language Coming into General Use.

We have traveled more than 2,500 miles in India, have seen its grandest scenery, its largest and most interesting cities, its most fertile and some of its desert regions. We have found in the East the best examples of Hindoo and Mohammedan architecture. Of course there is much we have not seen. The Dravidian temples of the south of India, remarkable for their size and elaborate decorations, best illustrated at Tanjore and Madura, we can only judge by small specimens seen at Madras and Pondicherry. The wonderful cave temples of Ellora, Ajunta and many other places we have got a fair conception of from that of Elephanta. One could spend years exploring India without exhausting its layers of civilization. We have endeavored to intelligently study, by observation and reading en route, the ethnology, sociology and theology of the country. We have missed no opportunity to talk with British officials and educated natives. We have looked into the work of the missionaries and come to the conclusion that they are doing a great deal of good, though not exactly in the way it is popularly understood at home. I think I may say that our travels in India have materially broadened our views of Asiatic history. Especially have we been impressed with the spectacle of an empire of 240,000,000 people of different races and religions, governed by a handful of Europeans, and in the main well governed, with a large measure of liberty, as perfect protection of life and property as is provided in the most civilized countries of Europe and increasing means of education. The universities and colleges scattered over India are turning out annually thousands of educated natives. It is a curious fact that the Indian who speaks English speaks it without accent and rather better than the average of English or Americans. Nearly all of the schools above the primary grade teach English, and in the majority of them it is the medium of education. More than half of the native newspapers and periodicals, which are numerous and well conducted, are printed in English.

I do not think it a wild prediction that English will be essentially the language of India a hundred years hence. It is curious to contemplate what will be the political result of the education of the Indian people. Will they be content, especially those of the Aryan race, capable of high development, with the shadow of a government which is sometimes driven to its wits' ends with its own domestic problems, in a group of little islands 5,000 miles away? For the present I can scarcely conceive of a greater calamity for India than the failure of Great Britain to hold and govern the country. It would be the signal for the anarchy, which would entail the destruction of the people and seriously obstruct the onward march of human progress.

India is a poor country. Its fabulous wealth has been carried off by conquerors or gathered into colossal fortunes by the few rich. The great body of the people are miserably poor. They barely keep body and soul together and do not store up any vital force to resist disease. The failure of one crop entails widespread distress. The failure of two in succession means famine for millions. The government is doing something to improve the conditions. In the last five years canals have been built, increasing the area under irrigation about 25 per cent. How much advantage the tiller of the soil gets from these improvements I do not know. The government costs too much, and the people are taxed to the limit of endurance. The British India civil service is called the best in the world. It is undoubtedly the most expensive. It costs \$11,000,000 (\$55,000,000) a year. The civil servant serves in various capacities, from a clerk to a lieutenant governor, for 25 years, four of which are given for holidays, and retires with a minimum pension of £1,000 per annum. The cost of all this comes out of the Indian people, and their superstitions and customs rob them of a part of what is left.

There are grave problems in India and more to come, and to solve them will require all the talent which can be secured. It is doubtful whether the merchants of London, the manufacturers of Manchester or the hereditary aristocrats who are sent to hold vice regal courts in Calcutta will solve them in the interest of the people of India, who are today about the poorest fed, clothed and housed people on earth. Yet I cannot but think that these people are capable of great things in the future if they can be properly nourished and educated. Their bright, distinctly Aryan faces look out appealingly through surroundings of squalor and superstition and give promise of high development under favorable conditions. Indeed we see splendid specimens of manhood among them today, and their graceful courtesy shames our ruder manners.—Cor. Boston Herald.

Serving Toast.

Dry toast should be served directly from the toaster. When this is not practical, pile it on a heated bread plate, cover it with a napkin and put it on the hearth or in the oven. Toast is given in all slight attacks of sickness because it is so easily digested. The more thorough the conversion of the starch the more easily and perfectly the system will manage it, for the change of starch into dextrine by the action of heat is simply doing outside of the body what takes place in it, in the ordinary course of digestion, by the action of the digestive fluids. Therefore when this is accomplished by artificial means nature is spared so much energy.—Philadelphia Times.

**BALD HEADS!**

What is the condition of yours? Is your hair dry, harsh, brittle? Does it split at the ends? Has it a lifeless appearance? Does it fall out when combed or brushed? Is it full of dandruff? Does your scalp itch? Is it dry or in a heated condition? If these are some of your symptoms be warned in time or you will become bald.

**Skookum Root Hair Grower**

is what you need. Its production is not an accident, but the result of scientific research. Knowledge of the diseases of the hair and scalp led to the discovery of how to treat them. "Skookum" contains neither minerals nor oils. It is not a dye, but a delicately cooling and refreshing tonic. By stimulating the follicles, it stops falling hair, cures dandruff and grows hair on bald heads.

Keep the scalp clean, healthy, and free from irritating eruptions, by the use of Skookum Skin Soap. It destroys parasitic insects, which feed on the scalp.

If your druggist cannot supply you send direct to us, and we will forward prepaid, on receipt of price. Grower, \$1.00 per bottle; 6 for \$5.00. Soap, 50c. per jar; 4 for \$2.00.

**ROGER DRURY'S TREE.**

Planted by the Boy, It Furnished the Boards to Make the Man's Coffin.

Fifty years ago Roger Drury of Webster county, Ky., then a 10 years old boy, planted the stone of a cherry that he had eaten on the farm of his father. It took root and in a few years became a prolific tree and was known by the family as "Roger's plant." From year to year the lad collected and sold the product, invariably hoarding the money received, even after he had attained manhood, was married and had children of his own, who aided in the management of the farm bequeathed by his father.

Last summer, in his sixtieth year, Roger Drury's health declined and became seriously impaired, and at the same time the cherry tree manifested unmistakable evidences of decay, when the old man had it cut down and sawed into boards, from which he had his coffin constructed, for utilization when the final summons came. Three weeks ago he was compelled to resort to his bed, when he sent for an undertaker and gave final directions for the coffin's trimmings, expiring shortly afterward. The funeral expenses were defrayed from the fund saved by the sale of the cherries of the tree planted in his boyhood time.—Henderson (Ky.) Correspondent.

**Encore C. O. D. Only.**

An Italian impresario has discovered a way out of the "encore" difficulty that is not open to the objections made to Mr. Hermann Vezin's proposal that they should be forbidden by the public authorities. The impresario in question controls a small operatic theater in Milan, and he has absolutely forbidden his singers to repeat any of their songs, but at the same time he has placed the following notice in the vestibules: "Those persons who wish for a repetition of any numbers from the opera, or of any part of the ballet dancing, are begged to hand in their names at the box office. At the end of the performance they will enjoy the encores demanded on paying for their seats over again." Since this measure was first adopted no one has availed himself of the privilege thus granted, and the performances have not been interrupted by demands for encores.—London News.

The legal world of London is much exercised over the complications likely to ensue from revelations made in a trial which has been held before Mr. Justice Chitty. It appears that in a marriage contracted in 1865, which up to the present time was thought to be valid, both parties were women.

In the year mentioned Mrs. Rachel Elizabeth Cullener, a widow, was harassed by creditors who wanted to attach the income she derived from the will of her husband. This income, by the will, she would lose if she married again. She had living with her a son and daughter, together with Miss Sophia Newland, a cousin of Mrs. Cullener's late husband.

The whole family was suffering for want of food, when it was suggested by the daughter that her mother marry again, after which her children would collect the income and support her. It was difficult to find a husband who could be trusted. So Mrs. Cullener, in man's clothes, under the name of James Stanley, was married in due form to Miss Sophia Newland, who at the marriage ceremony took the name of Mrs. Cullener.

Both signed their borrowed names in the register of the parish, and Mrs. Newland lived with Mrs. Cullener until 1883. Both have testified on the trial to the facts here narrated. Mr. Justice Chitty refused to believe the witnesses and dismissed the case, holding that a woman who has by her own admission, been for years "stepped in fraud" has no right to complain if the courts decline to believe her when she comes forward in her own interest to impeach a solemn entry in a marriage register, the accuracy of a verbal in a deed to which she was a party and the plain intention of her husband of the course of conduct of the parties has been pursued.—London Standard Commercial Advertiser.

**IT IS NOT** what we say but what we do that counts.

**PROBATE NOTICE.**

In the District Court of the State of Nevada, in and for the county of Washoe, in the Matter of the estate of John Gigliotti, deceased.—Mary Gigliotti, executrix, and Gaspare Gigliotti, executor, having filed their petition heretofore duly verified, praying for an order of sale of the whole of the estate of said deceased, for the purpose therein set forth. It is therefore ordered by the Court that all persons interested in the estate of said deceased appear before the said District Court on the 15th day of July, A. D. 1894, at 10 o'clock in the forenoon of said day, at the court-room of said Court, in Reno, Washoe county, Nevada, to show cause why an order should not be granted to the said executrix and executor to sell the whole of the real estate of said deceased at private or public sale, and that a copy of this order be published at least four successive weeks in the Daily Nevada State Journal, a newspaper printed and published in said town and county.

A. S. CHENEY,

District Judge.

Dated at Reno, Nevada, June 12, 1894. 4w
